SHAKER COLLECTION

Hidcote | Malton | Tresco

INTRODUCING TRESKO, MALTON & HIDCOTE

-

Our three new ranges, Tresko, Malton and Hidcote demonstrate attention to detail and authenticity is the core of our latest offer. Using sustainable timber, high quality components and skilled craftsmen, we're able to offer strong reassurances on quality and durability, all supported by our prestigious Manufacturer's Guild Mark award and comprehensive ten-year guarantee.

All three ranges are variations of the popular shaker style that offers enduring appeal. Malton and Hidcote are the most pared back, whilst Tresko is the more classical choice with its delicately beaded profile. The unfussy styling makes it possible for the ranges to be cleverly positioned in any setting and property type. The honest shaker design can be styled as such or elevated with the addition of key accessories, colour choices and handles to give a more luxurious detailed finish.

Intentionally, we've designed each of the ranges to reflect the decorative in-frame ranges within our Kitchen Makers collection, making them helpful companions to one another. Tresko is stylistically paired with Somerton and Malton with Haddon, and Hidcote forms the perfect partner with Alderley.

Their shared design details allow you to combine the compatible ranges into the same kitchen scheme. If desired, for reasons of design choice or budget, the more pared back options of Tresko, Hidcote or Malton can be utilised in adjoining areas such as the utility, pantry or boot room.

But we're not wanting to undersell these latest designs. Manufactured to the same exacting standards in the same UK workshops as our in-frame ranges they have the same premium paint finishes and high specification cabinet interiors.

The ranges come with the same selection of coordinating accessories and curated colour palette that allow you to add character to your kitchen. To suit the unique set of requirements of each home we offer a wealth of made to measure features; from exclusive cabinet sizes and bespoke accessories through to personalised colour.

Let's not forget the interior of your kitchen and speak about this for a moment, as there are more options to suit lifestyle, taste and budget. The range boasts an enormous choice of units and intelligent storage solutions, from SpaceTowers and pull out shelving to bottle and towel rails.

Select from either an MFC or Natural Oak veneered cabinet for your interiors. Both are supremely reliable options, the MFC cabinet is available in a choice of four colours whilst the more authentic, premium grade veneered natural oak cabinet is sealed with a protective, low sheen matt lacquered finish. There are further options for drawer boxes, which can be either Blum LegraBox or hand-crafted dovetail jointed timber drawer boxes.

Once you've specified your kitchen, the result is a kitchen which is uniquely yours, and which functions in a way that perfectly suits the way in which your family live their life.
